PROCEDURES

Before the meeting:

To facilitate the handling of the virtual meeting, a restricted group of experts is envisaged (see list of participants below).

Members of the Scientific Advisory Committee (SAC) of MOST, a group of Russian experts, members of BRIDGES, and other selected experts will actively participate in the meeting.

Communication to participants include the distribution in advance of the agenda and other relevant documents.

It's not enough for participants to have downloaded the right software. They are kindly requested to have tested that it works and familiarized themselves with its operation.

The two main coordinators and members of the MOST Secretariat are requested to join the meeting 15 minutes in advance (13:45 h) to check final details.

During the meeting:

The two main coordinators will control access to the microphones of all participants.

The two main coordinators will make introductions and icebreakers and if any participant is unable to use a video link and can only connect via microphone, the coordinators should be aware of this and make an extra effort to bring them into the discussion.

Be prepared for tech snafus: Tech will go wrong so just stay calm, have a backup and laugh a little (or a lot).

Visuals: You can prepare infographics and photos but only use them if they are great.

And remember, "Online is the new normal", but "The only thing worse than a long presentation in person is a long presentation during a virtual meeting."

Here is the "**time zone pain**" for several participants in this virtual meeting:

0 Paris
+1 Moscow
+ 6 Malaysia
+ 5 Thailand
-6 New York
-7 Mexico and Trinidad & Tobago
